

BABY CZ TOKEN OFFICIAL TOKEN

ABSTRACT

One of the newest and most attentive crypto currencies, BCZ Token, is led by a team of developers and marketing professionals aiming to create a buy-now or pay-later token. The tokenomics revolve around the fact that BCZ (BCZ Token) and is linked directly to your BCZ wallet. Users can buy or sell BCZ tokens and utilize them as store credit at no cost. Ideally, the team aims to create partnerships with exchanges and platforms that support the development start-up crypto currencies in the DeFi space. BCZ credit will be used to make purchases at local vendors in order to expand the security of spending digital assets on a regular basis. With every buy or sell, a percentage of BCZ tokens will be burned to LP in turn to increase the evaluation of the token. An integral part of this credit card is that BCZ tokens will never need to be converted to fiat in order to use BCZ credit as it will necessitate a direct conversion.

BABY CZ Token (BCZ) Tokenomics: Gas fees can be high and discourage buyers from purchasing tokens. Our team has decided to launch BCZ Token on the Binance Smart Chain (BSC) and lock liquidity on PancakeSwap to help avoid unreasonable gas fees. By having a low gas fee, and

operating cost we are able to take the extra savings and give it to charity without taking it out of your wallet. BCZ Token can be purchased with Binance Coin (BNB), the native token of BSC. Lower fees and liquidity locked in a trusted exchange will lower the barrier for entry and assure that developers are revoking permission to the initial funds that are raised by the project. Liquidity funds are raised on each transaction, allowing the freedom to trade while still providing stability to our market.
